We are your energy technology partner. We electrify, automate and digitalize every industry, business and home, driving efficiency and sustainability for all. We've always been at the forefront of energy and technology, leading the convergence of electrification, automation, and digital intelligence into what we define as energy technology. We invent the technology that makes the New Energy Landscape possible, enabling buildings, data centers, factories, plants, infrastructure, and grids to operate as open software-defined systems. Through platforms like EcoStruxure, we go beyond connectivity. We embed intelligence at every level, which unlocks the full value of energy and resources for our customers by simplifying complexity and enabling smarter, more efficient operations across every sector. No one else offers our breadth from the power edge to the production line. We don't just

connect systems; we create ecosystems where AI, data, and people work together seamlessly. As an Impact Company, we believe performance and purpose go hand in hand. Strong financial results fuel our ability to drive meaningful, lasting change. With an inclusive culture at our core, we empower everyone to play a part in building a more sustainable and resilient future.

DESCRIPTION

Transform Your Operations with 3D Simulation and Virtual Reality. With more than 25 years of experience in process simulation, logistics, manufacturing, and supply chain optimization, we help companies make better decisions before investing, modifying layouts, or implementing operational changes. Our FlexSim-based solutions, combined with 3D models and virtual reality, transform your processes into visual, measurable, and easy-to-analyze scenarios, enabling you to identify improvement opportunities, reduce risk, and demonstrate the financial impact of every decision. • Visualize your operations before making costly changes. • Identify bottlenecks, waste, and opportunities for improvement. • Compare scenarios to select the most profitable alternative. • Justify investments with clear data and high-impact visual presentations. • Reduce costs, improve efficiency, and accelerate return on investment. Simulation-Driven Decisions. Measurable Results.
